My purpose statement is as follows:

My proposition brings forth ideations incentivized to benefitting those identified as misfortunate, inclusive to individuals found within 3rd-world countries such as Africa. It serves the purpose of bringing forth heightened affordability under the regard of fire protective measures via a fire alarm.

My three ideas are..

- A renovated (affordable) iteration of the notorious smoke detector
 - A website dictating the revealing cause of providing those that cannot afford fire protective devices
 - A python project quizzing the client on the wide availability of smoke detectors
-
